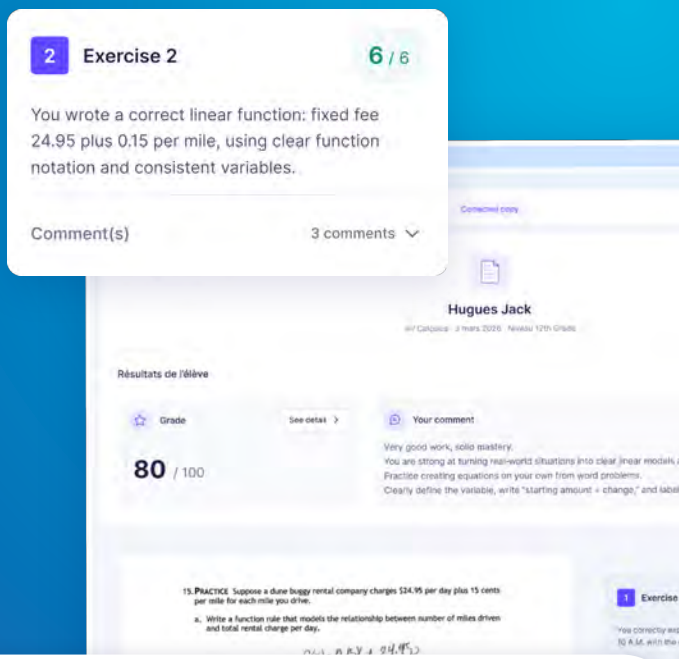
Ed.ai

The AI That Actually Understands Math

#1 AI grading built for high school math.
It reads handwritten work, follows multi-step reasoning, and maps every error to your state standards.



Grade a whole class in minutes

Ed.ai reads handwritten math with 95% accuracy and gives detailed individual feedback that pinpoints misconceptions and breaks down the reasoning.

Standards-aligned analytics

See which students have mastered linear functions and which still struggle with completing the square. Track mastery by standard. Period.

Targeted practice generation

Turn misconceptions into personalized practice. Generate worksheets, error-analysis exercises, or scaffolded problem sets in a click.

Safety and privacy

Built-in safeguards to ensure factual accuracy, highlight potential bias, and avoid collection of personally identifiable information (PII).

FERPA and COPPA compliant. Data privacy agreements (DPAs) available for your district.

Fits your existing tools.

Integrates with leading LMS platforms like Canvas and Schoology.

Single Sign-On with Clever, ClassLink, Google and Microsoft.

Export to Google Docs or PDF or print.
