ORIGO EDUCATION

Celebrating 30 Years of Math Excellence

www.origomath.com

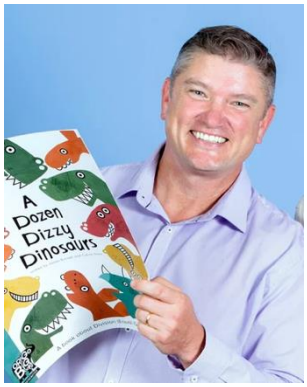
Dear AMTNYS Attendee,

ORIGO Education is thrilled to be a gold sponsor and presenter at this year's Association of Mathematics Teachers of New York State Annual Conference.

Since co-founding ORIGO Education thirty years ago in Brisbane, Australia, we have believed that the best mathematics education comes from a spirit of innovation and continuous research into the best teaching and learning practices found throughout the world.

While you are here, stop by our ORIGO booth and listen to my presentation as I dive into the challenges, and **solutions**, facing elementary mathematics educators in the areas of **number sense** and **fluency**. We will utilize visual models, play engaging games and progress through a logical, learner friendly sequence to develop extendable strategies.

When you visit, be sure to ask how our core curriculum, the all-new *Stepping Stones 2028* ©, and our award-winning supplemental solutions such as the *Book and Box of Fact Strategies*, support teachers like you in achieving these solutions. Also – don't forget to ask for a **free ORIGO Big Book – signed by me!**



Our mission at ORIGO Education is to make math learning meaningful, enjoyable, and accessible for all students and teachers.

In fact, elementary mathematics is our company's sole focus—something that we are proud of and that has led to long-lasting partnerships with educators throughout the world.

Sincerely,

James Burnett
Co-Founder, ORIGO Education
