EST COMPANIES

NCMS Sustainment Accelerator
Puget Sound Naval Shipyard

ZERO EXCLUSION.
FULL LIFECYCLE.

Problem Statement
Shipbuilding and industrial facilities must integrate complex equipment, maintain aging infrastructure, and keep waterfront operations mission ready. Gaps between installation, vendor coordination, and long-term sustainment often lead to delays, stranded assets, and reduced operational continuity.

Decision-makers need reliable partners who can support projects from initial planning through full lifecycle maintenance.

Benefits
EST provides complete lifecycle support that keeps critical systems operational. Our onsite teams deliver long-term maintenance, rapid troubleshooting, and warranty coordination to prevent downtime.

Comprehensive scoping and multi-vendor consolidation simplify procurement and ensure equipment arrives ready for installation. Working with EST allows pierside, shipyard, and industrial teams to maintain readiness across demanding environments.

Solution
EST delivers integrated construction, installation, and procurement support with full lifecycle coverage. We manage planning, site prep, installation, and sustainment as a single accountable partner.

Our teams remain onsite for inspection, troubleshooting, and long-term sustainment so every system continues performing as intended. This approach reduces risk, increases reliability, and ensures mission-ready outcomes for our customers.
