

StoneAge, Inc.

Waterblast Tools • Automation • Cutting •
Engineered Solutions

CUSTOMER NEED

Industrial, maritime, and municipal customers need to clean, maintain, and access critical assets faster while reducing downtime, labor burden, and risk.

Manual waterblasting and hot-work cutting can expose operators to high-pressure hazards, fatigue, line-of-fire risk, sparks/heat, noise, hose handling, and inconsistent results.

Pipes, heat exchangers, tanks, reactors, surfaces, sewers/drains, cold-cut access points, and constrained work areas all require reliable tooling matched to the job.

CUSTOMER BENEFITS

Improves safety by moving operators farther from high-pressure water and reducing repetitive, manual, awkward, and heat-producing work.

Raises productivity and repeatability with durable tooling, automation, consistent process control, and faster job setup/execution.

Gives customers one partner for cleaning, cold cutting, standard equipment, custom engineering, training, spares, troubleshooting, and lifecycle support across industries.

STONEAGE SOLUTION

StoneAge manufactures high-pressure waterblast tools, hands-free automated equipment, smart technologies, rotary tools, abrasive waterjet cold-cutting systems, accessories, and sewer-jetting nozzles.

Applications span pipe/tube cleaning, heat exchangers, tank and vessel cleaning, surface preparation, drain/sewer cleaning, cold cutting for access/demolition, and specialty industrial assets.

StoneAge Solutions adds product modifications, custom-engineered systems, prototyping, training, technical support, and practical deployment guidance.

CAPABILITIES AT A GLANCE

TOOLS & CUTTING
nozzles • hoses • cold cutting

AUTOMATION
hands-free equipment

SOLUTIONS
custom systems • prototyping

SUPPORT
training • spares

Applications: pipe/tube • tank • surface • sewer/drain • specialty
