FASTENAL
Supply Chain Solutions

PROBLEM STATEMENT

Production teams lose valuable time walking, waiting, and searching for commonly used consumables.

Decentralized inventory can create stockouts, excess inventory, limited accountability, and reduced supply-chain visibility.

BENEFITS

- Critical supplies available closer to the work
- Less walk-and-wait time and stronger productivity
- Consumption control and user accountability
- Real-time inventory and usage visibility
- Scalable support across locations

TECHNOLOGY SOLUTION

Fastenal combines point-of-use vending, RFID-enabled inventory monitoring, Product Locator, local service, and replenishment.

The program is tailored around actual consumption to improve access, control, and continuous optimization.

PROVEN TECHNOLOGY AT SHIPYARDS
