

MARINE SOLUTIONS

Capabilities Statement

Marine Solutions is a premier marine and bridge infrastructure firm which delivers complex solutions to demanding projects. Marine Solutions has established itself as an industry leader by integrating engineering, construction, and commercial diving expertise under one roof.

Our multidisciplinary team of licensed engineers, credentialed inspectors, certified divers, and marine construction professionals operates under a unified inspect–design–build model that integrates engineering, commercial diving, and construction to reduce risk, improve constructability, and accelerate delivery.

We specialize in solving complex infrastructure challenges with practical, technically sound solutions which are consistently executed safely and efficiently.

As an employee-owned company, every project is personal. Our culture drives accountability, performance, and long-term partnership. Marine Solutions holds WBE and DBE certifications with select agencies and small-business status under construction NAICS classifications.

Core Services
